English

Great game. Please enjoy the coffee.. Great game, loads of fun.

I do wish that once you beat back the AI, it would continue to fight as hard as it did to start with. Many times I have beat off the main attack from the Brutal AI, and its like it never recovered from it. I go around the map to its factories and they sit idle, or they build raiders when they originnaly attacked with Striders. 9\/10 rating for me.
